What are the filler panels and how do you specify their dimensions?

Top and side filler panels are masking elements in the color of the fronts. They fill the empty space between the furniture and the ceiling and wall.

To select the correct height of the top filler panel, measure the distance from the floor to the ceiling, next to the wall and 50 cm from the wall, at several points along the planned installation line, preferably with a laser measuring device.

What is the side cover panel used for?

All furniture bases from the Sleep Varia system are manufactured in oiled oak and cashmere colors. When the planned furniture layout does not reach the wall and the side of the base is visible, we recommend installing a side cover panel in the same color as the fronts, which will unify the design.

What is Sleep Varia?

The Sleep Varia system is a configurable furniture set consisting of a bed or sofa base, wardrobes, and shelf units for the bedroom, living room, or teenager's room. You can supplement it with additional furniture such as dressers or TV cabinets.

These sets are ideal for large and small rooms.

If you have more space, choose layouts with a freestanding bed or a bed perpendicular to the furniture.

If you have a narrow room, choose layouts with a small bed parallel to the furniture.

When the living room becomes a bedroom, choose layouts with a sofa bed.

LED lighting and a choice of furniture colors will allow you to create **a unique mood and atmosphere in your apartment.**

Configure built-in furniture in five easy steps!

1. Choose the color for the base and fronts.
2. Choose a base unit with or without side tables.
3. Choose wardrobes, shelf units, and filler panels.
4. Choose a bed or a sofa bed.
5. Add complementary elements

Enjoy furniture tailored to your needs for years to come!
